Hello sir

I'm Shanuka Ashen, a cyber security undergraduate in SLIIT. Im contacting you with the help of Mr.Kanishka Yapa.

Actually i have found 2 vulnerabilities in Hutch cliq apk but the most impacted one is able to **deduct any hutch or etisalat users mobile credit balance (to rs.14)** and can **unregister from cliq app that can lead to loose activated data plans** also. The only thing i need to do these things is just the **mobile number**.

I have attached a full report of demonstration how i able to do the attack.(please ignore if there is any grammatical errors).

If there is anything to be clear out i would happy to help.This is my contact number - **0702912052**

Hope for a response.

Thank you.

Dear Shanuka

On behalf of Hutch, we would like to say thank you for finding out Clic App vulnerability and highlighting us immediately. We have escalated the issue to relevant teams to take immediate actions to close these VA's.

We will be in touch with you soon personally to appreciate your support.

Again, thank you very much !

Regards
